DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-6, 8, 9, 12, 14, 16, and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 2-5, the preambles of the claims are drawn to something other than the table assembly of claim 1. Correction is required.

With respect to claims 8, 9, and 14, the applicant has positively recited the combination of the table assembly and a ladder. Is the ladder required?

With respect to claims 12 and 16, there is no antecedent basis for “the top surface”.

With respect to claim 17, the step of “connecting” appears incomplete, as it is unclear as to what the platforms are connected.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3634

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Nelson #2,069,969. Nelson discloses a table platforms 19, 20, securable to ladder sections 10, 11, the platforms having top support surface 21, front supports 30, 31, rear supports (legs) 23, which are pivotally attached to surface 21, 24, having slots 26 there through, and pins 27, received within apertures/orifices (unnumbered).

Response to Arguments

Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mahaffey #2,430,642, Box #790,177, Lomo #1,706,795, and Hansen #1,712,110 are cited to teach ladder and table combinations.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Specifically, the applicant has now recited table units/components supported by a horizontal ladder. See claims 1, 10, and 13. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

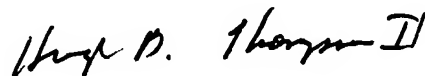

Art Unit: 3634

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
